

WAGO Analytics

Do You Know the Value of Your Machine Data?

Your Data is Valuable – Seize Its Potential!

Do you want to optimize your equipment? If so, do it in a manner that doesn't require a significant investment for sensors and actuators. Get to know your equipment better and take advantage of your data's potential. WAGO Analytics supports you in data acquisition and analysis and creates intuitive visualizations of the dependencies in your equipment. The connections that are uncovered are integrated into your processes and make it possible to fully exploit your potential for optimization.

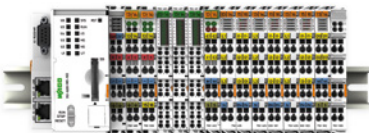

The Benefits for You:

- Identifying optimization potential
- Improving quality levels
- Saving energy and resources
- Increasing efficiency and reducing costs
- Improving process stability

The Steps from Data Acquisition to Data Analysis

1

Acquiring the existing machine and sensor data. WAGO offers all the components needed for this, e.g., the WAGO I/O-System 750 and PFC Controller

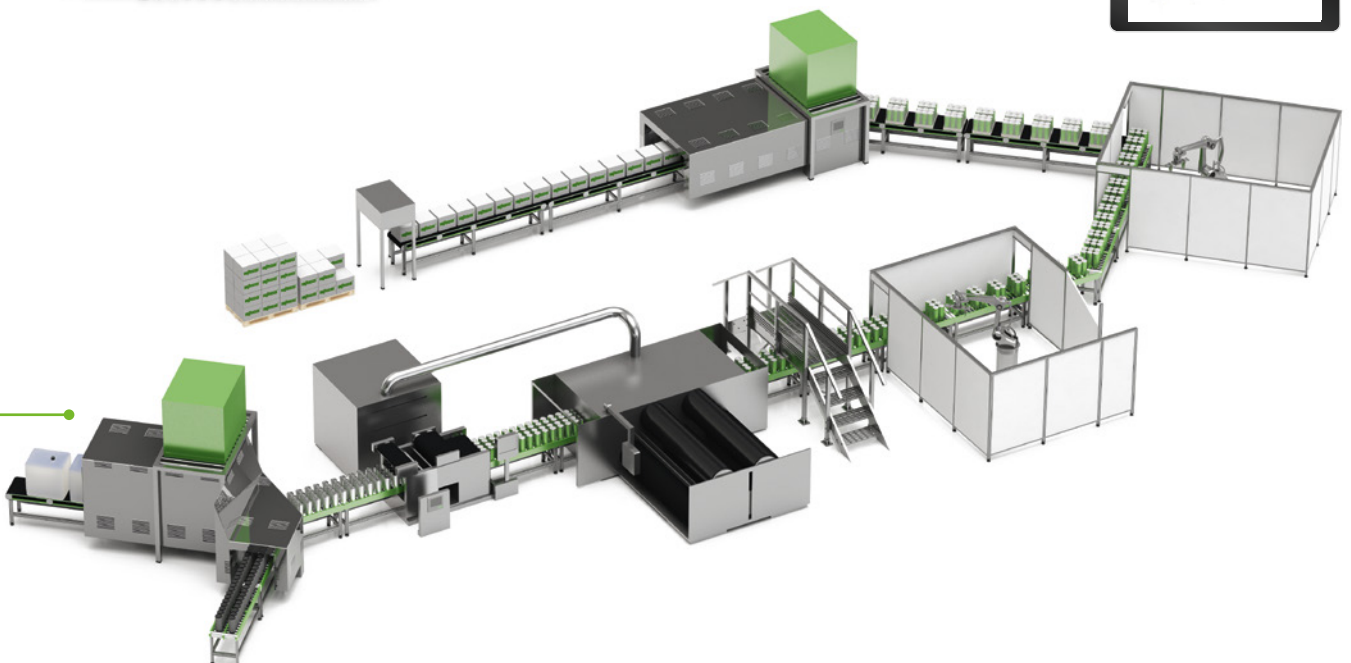

2

The data is recorded from the machine and stored in a uniform structure, either in remote storage or a cloud (e.g., WAGO Cloud).

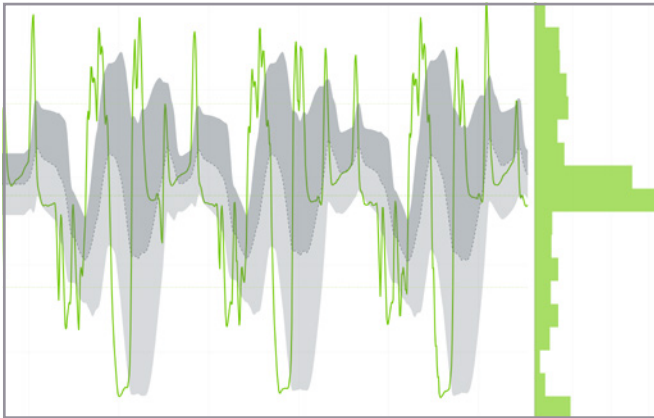

3

Analyzing and illustrating the information hidden in the existing data makes potential applications and connections visible. This gives you a greater understanding of your equipment and its processes.

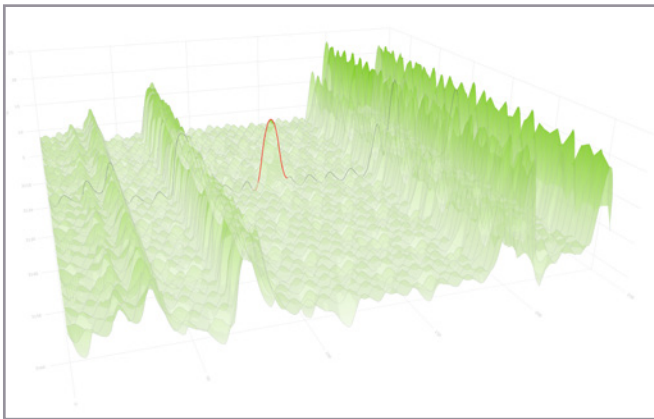

WAGO Helps You Use Your Data Profitably

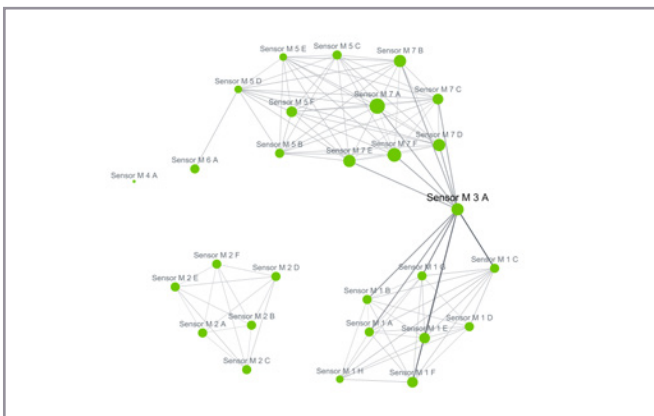

We help you understand your processes and guide you in successfully performing the following steps:

1. Gathering raw data from various data sources
2. Processing the data

3. Continuous data acquisition
4. Explorative data analysis and selection of the right representation

5. Integration into the operating process
6. Understanding connections and recognizing the potential for optimization

WAGO allows you to take advantage of the insights you gain and use them to make the most of your equipment's potential.
