

## WAGO Panel with Onboard Security

Touch Panel 600 offers high-tech screens and high-quality visualizations as well as advanced features. The engine has a Cortex A9 multicore processor providing fast operating speeds. Onboard security includes a built-in firewall and VPN to help users address cyberattacks. All panels are equipped with the future-ready Linux operating system and support HTML5 technology. They include three versions—Control, Visu and Web Panel—so users can select the technology that suits their applications. All of the devices include features such as an energy-saving standby function, integrated sensors for automatic brightness adjustment and an easy-to-mount design to make installation and operation simple.

### About WAGO

The WAGO Group is an international, standard-setting supplier of electrical interconnection, automation and interface electronic products. The family-run company is the world market leader in spring pressure connection technology. WAGO has continued to grow since being founded in 1951, with a current worldwide workforce of more than 8,000 – approximately 3,500 of whom are in Germany at its headquarters in Minden (North Rhine-Westphalia) and in Sondershausen (Thuringia). The company achieved sales of EUR 862 million in 2017.

Release: 2020
