

# WAGO Power supply for high-output applications

The Epsitron Pro Power provides reliable handling of applications that require high output and increased power peaks. Its slim design and versatile mounting options allow 50% savings of cabinet space on the DIN rail. Single- and three-phase power supplies have output voltages of 12/24/48 Vdc and nominal output currents from 5 to 40 A for almost every application. Every power supply comes with TopBoost, which can multiply the nominal current for up to 50 ms. The PowerBoost function provides 200% of output power for 4 seconds and 150% of output power for up to 16 seconds. Cage Clamp technology enables fast, vibration-proof and maintenance-free connections.

## About WAGO

The WAGO Group is an international, standard-setting supplier of electrical interconnection, automation and interface electronic products. The family-run company is the world market leader in spring pressure connection technology. WAGO has continued to grow since being founded in 1951, with a current worldwide workforce of more than 8,000 – approximately 3,500 of whom are in Germany at its headquarters in Minden (North Rhine-Westphalia) and in Sondershausen (Thuringia). The company achieved sales of EUR 862 million in 2017.

PCB terminal blocks with high performance data and convenient handling
