RILHEVA IIoT PLATFORM WEBINARS - AN HMS NETWORKS SOLUTION PARTNER

A complete and easy-to-use Remote Management Solution

Collect data from any industrial device, store it in the cloud and access it via web and mobile applications. Thanks to its cloud-based modular architecture, Rilheva can be turned to match requirements in different industries.

Rilheva and Ewon make possible an IIoT solution that brings many key advantages - rapid application development, a cloud-based SaaS application, a committed support team and more. Both Ewon and Rilheva are recognized in their field for their deep domain expertise and insight within key industry and application areas.

Rilheva, now an HMS Solution Partner, will be hosting a short webinar to show you how the Rilheva Platform Management, in association with Ewon's Device Management, allows you to efficiently and effectively reconfigure platform components. This includes demonstrating how associating Ewon gateways with Rilheva leads to a comprehensive solution that eliminates the customer's need to contract with an extensive set of IIoT vendors.

If you are interested to learn more about this solution and how to implement it on your Ewon devices, please see all details below to book your place today!
